

A New A-350 Size on a New Sprayer

Alliance's Row Crop tires on a new John Deere Sprayer

The Alliance Row Crop 350 (Narrow Radial) is a well established series in the market. To keep up with its position of being the global leader in this segment, ATG constantly innovates and expands its portfolio. The new & advanced sizes introduced equip a vast array of row crop machines, thus offering benefits to the end-user.

Mr. Letouzé Denis has a 400 hectare farm in Normandy, northern France and grows sugar beets, wheat, linen, and barley. In February 2013 Mr. Letouzé bought a new 6200 liters John Deere R962i sprayer. His request from the local dealer was to mount the relatively new size 380/105R50 168D A 350 TL on his new John Deere sprayer.

After just a few months of work, both the owner and the driver are very satisfied with the new tires. During a recent visit by ATG's field engineers, Mr. Letouzé highlighted the excellent stability, self-cleaning characteristics and foot print of the 380/105R50 A 350.

Mr. Letouzé commented: "The machine is working exactly as we wanted it to work in the field and on the road. Our next step will be to equip the tractor on with the same tire size".
