

Stable Performance of Alliance 345 Forestry Tires in Belarus

Customer : Miloshevichi Forestry
Location : Gomel, Belarus
Machine used : MPT 461.1
Application : Forestry
Tires in use : Alliance 345 (18.4-34, 10PR)

The chief mechanic of the Miloshevichi Forestry from Gomel region, Belarus, witnessed his satisfaction with the performance of 18.4-34, 10PR, 144A6 Alliance 345 Forest tires, mounted in 2011 on the rear axles of the two local tractors MPT 461.1. Both tractors are used in the forest works and for the road transport operations on the hard surface. All four Alliance 345 tires made on average **3000 work hours in three years period without a single puncture** or any other mechanical damage found. The tread wear, fixed on the first tractor, was 22-24 % and 29-31% - on the second one.

The chief mechanic said that “The result is very positive in comparison to the local tires, having much less resistance to cuts and penetrations as well as giving much less tread life. The maximum life time of the local tires is 1-1.5 years with much lower load capacity due to the weak casing construction, not capable to resist overloading, the most common problem in the forestry. Whereas the Alliance Tires have an exceptional tread life with strong carcass and high performance.”

The Chief Mechanic, Mr. Michael, confirmed the plans of their enterprise to expand using Alliance brand forestry tires due to their exceptional functional stability and extended performance time. He mentioned also the high quality service of the Belshintorgservice, ATG local dealer, to be the important reason for his choice.

Alliance Tire Group specializes in the development, manufacturing, and marketing of tires for Agriculture, Forestry, Construction, Industrial, Earth Moving and OEM applications, under the Alliance, Galaxy, and Primex Brands.

Backed by nearly 60 years of experience, Alliance Tire Group serves customers in 120 countries and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products.

All of the Group's tires are developed and tested at its advanced R&D centers.
