

Alliance 365 Agristar has a new Scottish Fan

Customer: A Grant Contractors
Location: East Calder
Machine used: John Deere 7530
Application: Agriculture & Allied
Tires in use: A-365 650 / 65R42 170D
 A-365 540 / 65R30 150D

During early 2015, contractor Andrew Grant wanted to replace his tractor tyres which had completed 3299 working hours. He was not dissatisfied with this performance as the tractor works most of the time on the tough roads but given the price to replace with the same, he considered other options. One of the options was A-365 and he finally decided to go with Alliance to compare performance.

He has been very pleasantly surprised with many aspects of the new Alliance 365 tyres' performance. They have currently **completed 1500 hrs and are performing really well despite the heavy roadwork (4000+ hrs projected on current fitment)**. The **comfort on the road is very good**. He had assisted another tractor to get out of a sticky situation which **impressed him with the traction capabilities**.

He is so happy with the tyres that he is planning to replace all the competitor tires that are currently on his Fastrac with Alliance 365 after they wear out. He commented that he was reluctant at first to try a less expensive brand as there is no guarantee of performance and while you may get good traction, the tyres will not return the life, a common worry. This compromise now

seems to be unnecessary. "These tyres cost less than the other high priced brands and are better than them in all categories, a real no brainer".

Andrew Grant with his John Deere on Alliance A365

Alliance Tire Group specializes in the development, manufacturing, and marketing of tires for Agriculture, Forestry, Construction, Industrial, Earth Moving and OEM applications, under the Alliance, Galaxy, and Primex Brands.

Backed by nearly 60 years of experience, Alliance Tire Group serves customers in 120 countries and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products.

All of the Group's tires are developed and tested at its advanced R&D centers.
