

SUCCESS STORY

Alliance 550: Exceptional Multipurpose Tires in Spain!!!

Customer: Jose Manuel Centelles
Location: Region Valencia - Spain
Machine used: FENDT 820 VARIO TMS
Application: Road & Gravel Crushing
Tires in use: A 550 540/65R30 (Front)
A 550 650/65R42 (Rear)

Following the suggestion of local Spanish market Field Engineer, Mr. Jose Centelles fitted Alliance 550 tires on his FENDT 820 VARIO since the normal R-1 radial agricultural tires were not performing as he expected. The tractor is mainly used for road transport and gravel crushing. So, he wanted tires which can perform on both conditions. The previous tires gave a life of 4500 working hours and it was very common to have punctures and needed regular repairs.

The complete set of Alliance 550, fitted in December 2014, demonstrated exceptional stability and operational comfort on both the concrete and rocky surface. The performance during the daily 50 km transport operations on the hard roads of the country side were also very good as the tires are also very good resistance to punctures.

According to Mr. Jose, the tractor is running much smoother on the road at higher speeds and it completely stopped the machine from jumping on

road at high speeds. The tractor is fitted in the rear with a 1000kg gravel crusher and has an extra 1200kg on the rear axles and 1500kg in the front. After 650 working hours, the tires have only worn out 2mm, both front and rear axle and should have an expected life of at least 6000 hours. This would mean that these tires would last 50% more than the previous competitor tires. Also Mr. Jose says that there is much less rolling resistance and the fuel consumption is considerably lower.

Alliance Tire Group specializes in the development, manufacturing, and marketing of tires for Agriculture, Forestry, Construction, Industrial, Earth Moving and OEM applications, under the Alliance, Galaxy, and Primex Brands.

Backed by nearly 60 years of experience, Alliance Tire Group serves customers in 120 countries and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products.

All of the Group's tires are developed and tested at its advanced R&D centers.
