

Alliance 331 HD, helps keep the Dutch canals free and flowing!

Customer: Martin van Noort
Location: Schalkwijk, Netherlands
Machine used: Mecalac 12 MTX Speeder
Application: Municipal / Canal cleaning
Tires in use: A 331 HD 700/40-22.5

Martin van Noort is self employed contractor based in Schalkwijk, Netherlands. He uses his Mecalac MTX12 Speeder, wheeled excavator for cleaning the canals from reeds and grass.

Martin van Noort bought this machine in 2013. Due to his good experience from the past, he equipped the wheeled excavator with a set of 700/40-22.5 Alliance A-331 HD (Heavy Duty) tires. For many years the Alliance 331 (700/40-22.5) has been his number one favourite tyre. He can work at least 10.000hrs without any single problem!

Mr. Martin van Noort maintains a lot of the Dutch canals. He has to travel from on canal to another and also venture off road. This combination of on and off road work on a continuous basis needs tyres that can provide comfort in all situations and give ample traction when needed. When he's off road he has to work on protected landscapes and / or agricultural fields, where soil compaction and damages is not desired.

Currently Mr. van Noort worked more than 3700 hrs in less than 2 years with his Mecalac and 331's, with still an average remaining tread depth of 33mm. The tyres as well as the machine are making him and his project promoter really satisfied, due to the low compaction and damage to the soil. For Mr. van Noort the comfort, traction on and off the road, fuel consumption and driveability of the tires is also a great advantage.
