

Alliance 328 Flotation. Years of service in the UK!

Customer: Trow & Sons
Location: Telford, Shropshire, United Kingdom
Machine used: Agricultural Trailers
Application: Agriculture & Allied
Tires in use: A 328 Flotation

For many years now Trow have used the Alliance 328 Flotation on their trailers because they are the only tyres to carry the load at the speed required without giving problems. They have used both 600/50-22.5 and 700/50-22.5. They rate the tyres so highly that they have recently recommended them to a neighbouring farm who have just ordered a set having had problems with tyres from another popular brand breaking up and returning poor life. Jonathon Trow (pictured) will be fitting his JCB Fastrac tractor with Alliance 365 Agristar or Alliance 360 to test them when the current tyres are changed this autumn. Their equipment includes: - a combine Harvester, six tractors, a telescopic handler, a backhoe loader, one baler and seven trailers (3 of which are on Alliance 328 Flotation tyres).

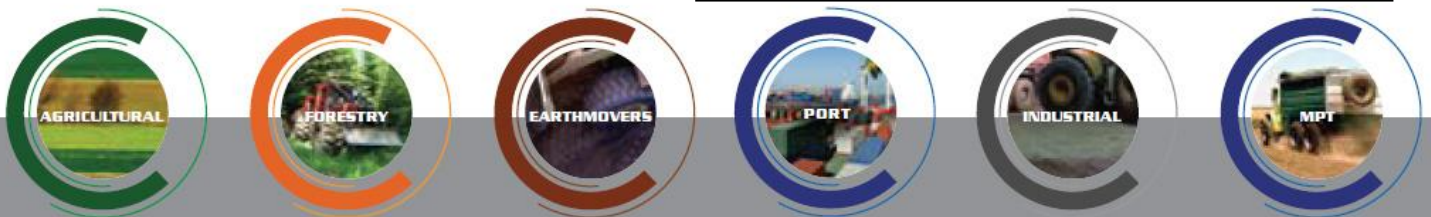

Jonathon Trow with His trailers

Design 328 is a pioneering flotation tyre from Alliance. It continues to be a popular tyre for agri-transport requirements with farmers across Europe and North America.

This I-3 tubeless flotation tyre with good self cleaning characteristics is suitable for agricultural implement, and in particular, for towed vehicles. Its high load capacity at low inflation pressures prevents damage to fields and crops. It is suitable for on and off-the road agricultural service on trailers, tractors and large implements. The tyre's strong nylon construction and compounds ensure long life.

Alliance Tire Group specializes in the development, manufacturing, and marketing of tires for Agriculture, Forestry, Construction, Industrial, Earth Moving and OEM applications, under the Alliance, Galaxy, and Primex Brands.

Backed by nearly 60 years of experience, Alliance Tire Group serves customers in 120 countries and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products.

All of the Group's tires are developed and tested at its advanced R&D centers.
