

Harvesting satisfaction

Successful results to Alliance Tires on A New Holland CX780 Harvester

Alliance Europe's team recently completed a successful technical test of Alliance tires on a New Holland CX780 harvester owned by Mr. Eric Cherel from Loudéac, Brittany, France.

Two Alliance models were mounted on Mr. Cherel's NH CX780 harvester:

- A-375 size: 800/65R 32 172 A8
- A-570 size: 500/85R 24 171 A8

Mr. Eric Cherel next to the A-800/65R 32

After testing the tires on the NH CX780 for over 300 hours of cornfield harvesting and driving in mud, the machine operator expressed his total satisfaction with the Alliance tires. He noted that the tires delivered "**very good traction and excellent stability**".

The test was a success, and Mr. Cherel will be using the Alliance tires through the next harvest season.

New Holland CX780 at work

Besides the NH CX780, Mr. Cherel has several other agricultural machines, all equipped with Alliance Tires:

- Mauguin 18,500-liter slurry tanker with four 650/55R26.5 A-380HD tires
- An 18-tonne trailer with four 650/55R26.5 A-380 HD tires
- A tractor with two 540/65R34 A-365 tires

ALLIANCE COMBINE TIRES

- Full ranges of cutting-edge combine tires
- Puncture-proof steel reinforcement
- Superior "stubble guard" tread rubber compound
- Wide range of rear axle tires including radial and diagonal flotation tires
