

SUCCESS STORY

Kick forestry performance up to a new level

One look at the PRIMEX LOGSTOMPER XTREME LS-2 and it's easy to see that this is no ordinary forestry tire.

Check out the variable-angle lug design. It tapers as it arcs from the center to the shoulder, enabling the Primex Xtreme to deliver:

- Market-leading traction in virtually all soil conditions in forward and reverse.
- Exceptional stability on steep hillsides.

CHUNKING AND CUT RESISTANCE

B.J. Allred of Thomas Tire in Gold Hill, NC, has mounted Primex Xtremes LS-2s for several customers. Here's what he says:

"I like the performance of the Primex Xtreme tire. They don't cut out or chunk out as much running on stumps, rocks and different things as other skidder tires...the Xtreme is by far right now the best skidder tire that you could probably get. All in all performance, the Xtreme is running a lot longer."

The outstanding resistance to cuts and chunking is thanks to the Primex Xtreme's specially formulated forestry compound. The heavy sidewall and thick underskid also provide long-lasting durability to keep harvest equipment – and logs – moving.

KEEP LOGS MOVING

Here's what Jeff Brown, a feller-buncher operator with Hammill Logging in Gold Hill, NC, says:

"I've been running Primex probably 10 years off and on, and I've never had any flats or or any downtime with Primex. They've held up their end – they've done real well for me."

"In the past, I've had a bunch of trouble with other competitors – sidewalls busting out, splitting on the sides. When I switched to Primex, all the trouble went away."

The Primex Logstomper Xtreme LS-2 is available in sizes that fit hardworking skidders, including:

- 23.1-26
- 28L26
- 30.5L32
- 35.5L32

Alliance Tire Group specializes in the development, manufacturing, and marketing of tires for Agriculture, Forestry, Construction, Industrial, Earth Moving and OEM applications, under the Alliance, Galaxy, and Primex Brands.

Backed by nearly 60 years of experience, Alliance Tire Group serves customers in 120 countries and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products.

All of the Group's tires are developed and tested at its advanced R&D centers.
