

SUCCESS STORY

The expert's favorite

Karp-Kneip Construction is a leading Luxembourg business entity with interests in the infrastructure industry. They specialize in asphalt road work, building, and construction.

With more than 40 wheeled loaders and various types of excavator machines, they are an opinion leader in the industry, especially for a wide range of tire applications in their business. They have been using tires from the most leading brands for their machines.

Mr. Daniel Tramblay has been with Karp-Kneip Construction for over 12 years and is one of their most experienced operator.

Mr. Tramblay operating his machine.

For the last 4 years he has been operating Mecalac wheeled excavators installed with Mitas MPT-01 tires, and currently operates a Mecalac 12MXT multi-functional excavator installed with Alliance A-317 MPT tires.

Mr. Tramblay reports an exceptional better performance of the Alliance A-317 tires, comparing to the Mitas MPT-01. He stated that the A-317 delivers better ride comfort over hard surfaces, has superior lateral stability, and forward stability.

He also pointed out that the shoulder design of the A-317 provides greater sidewall protection, which he observed is not present in the designs of Goodyear, Mitas and Dunlop.

“An exceptional better performance”

Alliance A-317 (405/70 20) on the MeCALAC 12MXT

Alliance A-317

The Alliance A-317 is a popular MPT offered from Alliance. There are 5 different Ply Ratings (PR) offered in the size 405/70 20 and 3 different PR in 18 -19.5 sizes and is the widest offered in this category any brand.

- ▶ Wide base tire for multipurpose on highways, off-the-road and agricultural application
- ▶ Special casing construction, together with specific tread rubber compound enable low heat build-up and speed of 90 km/h
- ▶ Specific 45 degrees lugs angle are developed for combine application on and off the roads
- ▶ High tilt angle and great side slope stability of machines
- ▶ Closed center for longer life time on the roads
- ▶ Sharp shoulders increase aggressiveness

ALLIANCE MPT RANGE:

317

- Application: On highways, off-the-road and agricultural services;
- Special casing construction, together with specific tread rubber compound enables low heat build-up at high speed of 90 km/h
- 45 degrees lugs angle are developed for on and off the road applications
- Closed center lug provide longer life on the roads
- Sharp shoulders protect sidewall
- High tilt angle and great side slope stability of machines

Available Sizes:

- 11.5/80-15
- 10.0/75-15.3
- 11.5/80-15.3
- 10.5/80-18
- 10.5-18MPT
- 12.0-18
- 12.0/75-18
- 12.5/80-18
- 12.5-18MPT
- 10.5-20MPT
- 12.5-20MPT
- 14.5-20MPT
- 405/70-20

224

- Application: On cranes and excavators
- Wide base tubeless tire.
- The diagonal lugs are designed to enhance self-cleaning and for providing excellent on and off-the-road driving
- Excellent traction in all working conditions along with resistance to side-slip
- The strong nylon carcass ensures longer life
- High tilt angle and great side slope stability of machines

Available Size:

- 18 – 19.5

225

- Application: On highways, off-the-road and agricultural services
- Special casing construction, together with specific tread rubber compound enables low heat build-up at high speed of 90 km/h
- Lower lugs angles provide higher traction
- Closed center lug provide longer life on the roads

Available Sizes:

- 12.5 – 20
- 16/17 – 20
- 405/70 - 20

With three patterns and 17 sizes, Alliance MPT range provides wider options to suit different needs in terms of application, industry, and machinery.

Alliance Tire Group specializes in the development, manufacturing, and marketing of tires for Agriculture, Forestry, Construction, Industrial, Earth Moving and OEM applications, under the Alliance, Galaxy, and Primex Brands.

Backed by nearly 60 years of experience, Alliance Tire Group serves customers in 120 countries and offers a full spectrum of products, from basic entry-level tires to a broad range of superior quality value-added products.

All of the Group's tires are developed and tested at its advanced R&D centers.
