

## **ATG presents new multi-purpose tyres for earth moving trailers at Intermat 2015**

*New tyre specially designed for use in trailers in size 24R20.5. All steel construction to provide a robust and tough tyre to be used in demanding conditions.*

**20.04.2015 | Paris, France**

Efficient transport and earth moving operations in construction sites depend on appropriate technical and technological solutions: With the new multi-purpose tyres for trailers, the leading Off-Highway Tyre (OHT) manufacturer Alliance Tire Group (ATG) presents high volume radial flotation tyres designed to optimise the efficiency of bulk transport operations. "When developing these new high performance radials, our engineers have used the extensive experience gained with tyres for agricultural transportation", explains Dr. George Ronai from ATG's Israel based Research and Development department. "This new size 24R20.5 in design 392 was developed with several key objectives: In addition to high speed and load capacity, these tyres were designed for excellent flotation, high self-cleaning capabilities and significantly reduced rate of wear", says Dr. Ronai.

The size 24R20.5 in block type tread design 392 is a low pressure tyre for trailers; it was launched in addition to the proven 390 MPT block design. Both designs are low pressure all steel radial high flotation tyres for trailers used in earth moving operations for example. The deep non-directional block type tread design provides a large contact area, thus allowing for a significantly reduced rate of wear and lower soil compaction. Due to their all-steel construction and rubber compounds, these multi-purpose tyres enable comfortable high-speed driving on the road as well as excellent mobility and performance in all kinds of off-road transport operations", highlights Angelo Noronha, Chief Sales and Marketing – After Market, Europe.

About ATG

With nearly 60 years of experience, the Alliance Tire Group specializes in the design, development, manufacturing and marketing of Agriculture, Forestry, Construction, Industrial, Earthmoving, Mining and Port tyres under Alliance, Galaxy and Primex brands.

ATG serves customers in 120 countries, across 6 continents and offers a full spectrum of products, from basic entry-level tyres to a broad range of superior quality value-added products. All of the Group's tyres are designed, developed and tested at its advanced R&D centers around the world.
